

IN PARLIAMENT  
HOUSE OF COMMONS  
SESSION 2013-14

**HIGH SPEED RAIL (LONDON – WEST MIDLANDS) BILL**

**Against – on Merits – Praying to be heard By Counsel. &c.**

**To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled.**

**THE HUMBLE PETITION of ISABELLA JASMIN MARGHERITA COCO PAROLA**

**SHEWETH as follows:-**

- 1 A Bill (hereinafter referred to as “the Bill”) has been introduced and is now pending in your honourable House intituled “A Bill to make provision for a railway between Euston in London and a junction with the West Coast Main Line at Handsacre in Staffordshire, with a spur from Old Oak Common in the London Borough of Hammersmith and Fulham to a junction with the Channel Tunnel Rail Link at York Way in the London Borough of Islington and a spur from Water Orton in Warwickshire to Curzon Street in Birmingham; and for connected purposes.”
- 2 The Bill is presented by Mr Secretary McLoughlin, supported by The Prime Minister, The Deputy Prime Minister, Mr Chancellor of the Exchequer, Secretary Theresa May, Secretary Vince Cable, Secretary Iain Duncan Smith, Secretary Eric Pickles, Secretary Owen Paterson, Secretary Edward Davey, and Mr Robert Goodwill.
- 3 Clauses 1 to 36 set out the Bill’s objectives in relation to the construction and operation of the railway mentioned in paragraph 1 above. They include provision for the construction of works, highways and road traffic matters, the compulsory acquisition of land and other provisions relating to the use of land, planning permission, heritage issues, trees and noise. They include clauses which would disapply and modify various enactments relating to special categories of land including burial grounds, consecrated land, commons and open spaces, and other matters, including overhead lines, water, building regulations and party walls, street works and the use of lorries.
- 4 Clauses 37 to 42 of the Bill deal with the regulatory regime for the railway.
- 5 Clauses 43 to 65 of the Bill set out a number of miscellaneous and general provisions, including provision for the appointment of a nominated undertaker (“the Nominated Undertaker”) to exercise the powers under the Bill, transfer schemes, provisions relating to statutory undertakers and the Crown, provision about the compulsory acquisition of land for regeneration, reinstatement works

and provision about further high speed railway works. Provision is also made about the application of Environmental Impact Assessment Regulations.

- 6 The works proposed to be authorised by the Bill ("the Authorised Works") is specified in clauses 1 and 2 of and Schedule 1 to the Bill. They consist of scheduled works, which is described in Schedule 1 to the Bill and other works, which is described in clause 2 of the Bill.

### **Your Petitioner**

- 7 Your Petitioner is Isabella Jasmin Margherita Coco Parola. Your Petitioner lives at the Cock & Rabbit Inn, The Lee, Great Missenden, Buckinghamshire HP16 9LZ. Your petitioner is 13 years old and goes to the John Colet School in Wendover which is a 15 minute car ride at the moment before the HS2 construction traffic changes that. The extra time taken for travelling could affect your Petitioner's education by leaving her less time for home-work and studying. Your Petitioner will definitely be directly and specially affected, both during construction and after completion, by the proposed HS2 line. Your Petitioner lives in that part of the Chilterns Area of Outstanding Natural Beauty (AONB) which will be directly and adversely affected.
- 8 Your Petitioner's rights interests and property are injuriously affected by the Bill, to which your Petitioner objects for reasons, amongst others, hereinafter appearing.

### **Concerns**

- 9 Your Petitioner is seriously concerned about the disruptions to her household which will result from the construction of the line and the dust, noise, hours of work, vibration, traffic movements, congestion and access problems and other implications during what will be a long period of construction.

Your Petitioner is a reasonably talented sprinter and runs the 100 meters in around 13.8 seconds. She regularly uses the Guttman sports centre in Stoke Mandeville and has competitions at many of the Aylesbury schools. She loves her athletics and would be devastated if she had to give them up. Most of her friends and close family live in Wendover, Stoke Mandeville, Weston Turville, Aston Clinton and Aylesbury. HS2 during its construction and after it is finished will make accessing these places very difficult. This will seriously affect her social life and spending time with the people she cares about. Her Nanny lives in Halton Village and visits her very often but this will become less as collecting her and taking her home will take much longer, giving her Nanny less time to spend with her and her 8 year old brother Giacomo.

- 10 Your Petitioner is also concerned about the long term damage and permanent injury to and disruption of the visual impacts in the AONB of the construction of works authorised by the Bill and the operation of the line and particularly about the cumulative effect of environmental damage and disruption in the area between Mantles Wood and Wendover, where the Proposed Route is on the surface and is in an area is designated as an Area of Outstanding Natural Beauty(AONB) under Section 85 of the Countryside and Rights of Way Act 2000 (CROW Act) and is further protected under the National Planning Policy Framework and the European Landscape Convention.
- 11 Your Petitioner is concerned about the effects of noise and vibration, and dust, dirt and air quality and the severe disruption to traffic arising from the construction of the high speed railway and associated and that the operation of the high speed railway will give rise to noise and vibration in this tranquil area of the AONB. This would severely impact upon the use and enjoyment of the properties in this AONB area as well as on the neighbourhood's general amenities
- 12 Your Petitioner is concerned about the possible increase of crime in the area particularly during construction particularly as this appeared to have been the experience when constructing HS1
- 13 Your Petitioner is concerned about the impact of the construction works on the chalk stream of the River Misbourne and the damage to the quality of drinking water supply by the construction works
- 14 Your Petitioner is gravely concerned about the spoil to be excavated and arrangements for removal and storage of spoil within the AONB and in particular objects to the proposed spoil heap at Hunts Green , which if created, will take years to settle and become established and will, in any event, create wholly artificial hill and an unacceptable scar in the AONB
- 15 Your Petitioner is concerned that land which is occupied and utilised by contractors during construction will not be cleared and restored after completion to a satisfactory standard for the AONB or in the worst case that it will simply be abandoned by the contractors
- 16 Your Petitioner strongly objects to the diversions and closure of established public rights of way in the area which should all be retained and cross the line directly by footbridges and further that for, this section of the AONB, none of these bridges are to be Green Bridges despite the intentions of the Promoters to build green bridges elsewhere along the route.

#### **Remedies**

- 17 Your Petitioner requests that measures be taken and changes be made in the Bill or the Code of Construction Practice or by obtaining binding undertakings from the Promoter to address and remedy the various concerns of your Petitioner as

listed above in the most appropriate manner

- 18 In your Petitioner's opinion the best remedy to her concerns is not to build HS2 at all. It will be like the SNCF in France ordering trains too wide for the existing platforms at an extra cost of 50 million euros - another huge mistake like the high speed line from Paris to Lyon sucking business into the capital city not to Lyon. HS2 is not what her generation needs or wants. They need super fast broadband and mobile phone signal for the whole country. Your Petitioner lives 35 miles from our capital city but she can't get a phone signal to send a text message in the 21st century. If however ~~if~~ HS2 is to be built then people really affected need to be consulted in person to assist in finding solutions. People who have lived and worked in these areas for many years know it better than any engineer, environmentalist or expert. Like your Petitioner's Mum knows her better than any doctor, teacher or expert. Your Petitioner asks that the Promoter please does not build HS2 because it will destroy your Petitioner's countryside, community and way of live purely for the sake of vanity and keeping up with Europe.
- 19 Your Petitioner requests the Select Committee give such instructions and secure such undertakings from the Promoter or changes in the Bill to ensure the fullest possible protection of this part of the AONB, both during and after construction, this being a special requirement exclusive to this area as no other part of the line is within the AONB or has the statutory protection afforded to the AONB
- 20 Your Petitioner particularly requests that the AONB be protected from the effects of this grave planning error by amending the Bill to require the construction of a tunnel through the whole of the AONB section of the proposed line, such as by adopting the tunnel proposals submitted by Chiltern District Council and the Chilterns Conservation Board or, if this is not acceptable, by extending the present tunnel proposals by adopting the CRAG T2 proposals, each with possible variations. These latter proposals have been referred to in the Environmental Statement and which has been accepted by D f T and HS2 Ltd, in that Statement, as both feasible and environmentally preferable and would ensure that the line passes through the whole of the AONB in a bored tunnel. This would substantially remove the adverse effects complained of in the remainder of this petition and the need for the proposed remedies otherwise required.
- 21 Your Petitioner requests that, if the proposal for a full tunnel throughout the AONB is rejected, then the following mitigation measures should be adopted and implemented
- a. That the South Heath Chilterns Tunnel Extension (referred to as the REPA tunnel in Vol 2 2.6.18 CFA 9), or a possible further extension of the same, be adopted, particularly as this also has acknowledged environmental benefits
  - b. That, if that is not accepted, then the line along this section of the line be housed within deeper cuttings to the levels originally proposed by the 2011 consultation, with sound barriers and bunds, where appropriate, to seek to reduce noise and to conceal the line and the gantries and that the power for the contractor to raise the line by up to 3 metres is excluded for the AONB

section of the line

- c. That the existing proposed green tunnel at Wendover be extended to the south and north of Wendover.
- d. That provision is made for constructing bridges where there is established rights of way, including making these Green Bridges, bearing in mind not only the need to retain trees and shrubs but for wild life access, particularly given that this is part of the AONB
- e. That the speed of the trains be reduced as per the recommendation of the House of Commons Environmental Audit Select Committee Report, in order to help reduce the environmental impact and sufficient to ensure compliance with noise mitigation
- f. That the Wendover Dean and Small Dean viaducts and adjacent embankments be of high quality infrastructure to be made as visually pleasing as possible, with enclosures where possible and with the maximum use of noise barriers on both sides, including boxing in if necessary
- g. That the maximum amount of planting be used, at the earliest opportunity and with the use of mature trees able to grow to at least forty feet high, in order to conceal the line from view at the earliest possible time.
- h. That the plans for the Hunts Green Spoil Dump is cancelled and that arrangements are made for the spoil to be removed from the area by rail or pipeline. Your Petitioner point out that, if the full tunnel proposals is adopted, then the amount of spoil involved for this section of the line will be substantially reduced and it would also all be removed at the Wendover exit of the tunnel,
- i. That in relation to the balancing ponds, alternative sustainable urban drainage system techniques is considered in consultation with the local authority and that any ponds should not be artificially lined
- j. That in relation to the River Misbourne, and water supply, full surveys and continuing monitoring should be undertaken regarding water quality and the effect of the construction works, with actions undertaken, including cessation of construction in this area, if any adverse impacts is found
- k. That the pylons along this section of the line is removed and the power lines is reinstated underground.

27. Your Petitioner further requests that the nominated undertaker be required to mitigate the remaining nuisances, by giving the Code of Construction Practice legal effect with independent assessment of compliance and sanctions for breach and that the Code should specify, in all cases, the need for work, facilities and construction to be to the best available standards and techniques and to the highest standard of construction and operation of the railway and its associated developments and, in particular, that the Code or requirements in the Bill be so amended to enforce the following measures:-

- a. Restricting HGV movements daily from 09:30 to 15:30 throughout this section of the AONB.
- b. Additionally prohibiting HGV movements along school routes between 08.00 and 09.00 and between 15:00 and 15:30 during school terms.
- c. Prohibiting any widening or enlargement of the narrow minor lanes
- d. Constructing new roads for the contractors and vehicles to access the trace directly from the A413, and prohibiting the use of all existing narrow minor roads in the AONB by construction traffic.

- e. That the Promoter and the contractors should be required to construct the railway to ensure that during construction and operation of the line noise, dust and vibration is minimised to meet the highest standards applicable and controlled and that air quality is maintained
  - f. Constructing such facilities as may be necessary to remove spoil from the AONB area, including by rail or by pipeline, to apply proper methods of dealing with spoil and avoiding the creation of the spoil dump at Hunts Green.
  - g. That contractors in the AONB will be required to restore the land and temporary access roads after use to acceptable AONB landscaping and that local authorities be given the power to inspect such works and if necessary sanction contractors
  - h. During construction, the nominated undertaker must be responsible for maintaining the quality of all roads used during and after construction, so that the roads must be returned to its original size and character, and all damage repaired by the nominated undertaker.
  - i. That the Promoter provides an air ambulance with crew on standby during working hours, to ensure that medical emergencies receive a prompt response
  - j. that appropriate arrangements be made and put in place, including for the Promoter of the Bill to provide or secure the provision of the necessary additional finance, to enable the local police forces to increase policing and to put in place other protective arrangements and arrangements in order to reduce the risk of crime in the area particularly during construction
  - k. A hotline should be set up allowing residents to raise any issues of concern arising during construction and in particular for road users to report any damage to the road, and the local and highway authorities should have access to all reports, to ensure these is addressed and remedied in a reasonable length of time.
28. The Petitioner emphasises that the mitigation measures set out in paragraphs 23 and 26 and 27 above would in large measure be unnecessary and the impacts would be otherwise effectively mitigated if the Bill were to be amended to include the provision of a full tunnel throughout the AONB as referred to in paragraph 25 above.
29. Your Petitioner submits that the compensation provisions in relation to property that is not compulsory acquired and other matters are not sufficient to compensate persons affected adequately for the loss and damage they may incur as a result of construction and operation of the high speed railway and associated development.
30. Your Petitioner requests that the Bill should be amended to ensure that persons outside of the safeguarding area who are injuriously or adversely affected by loss of value should be entitled to claim compensation.
31. The list of grievances above is by no means exhaustive and, due to the inadequacy of and omissions and errors in the Environmental Statement prepared by HS2 Ltd , it is inevitable that that the construction of HS2 will disrupt the lives of the residents in the AONB, including those of your Petitioner , in ways which have not yet been considered.

IN PARLIAMENT  
HOUSE OF COMMONS  
SESSION 2013-14

HIGH SPEED RAIL  
(LONDON-WEST MIDLANDS)  
BILL

PETITION OF  
ISABELLA JASMIN  
MARGHERITA COCO

AGAINST, By Counsel, &c.
